多对多关联查询

```
select s.id,s.name,c.id,c.name
from student as s ,course as c ,student_course as sc where
s.id = sc.sid and sc.cid
= c.id and s.name = "张三";
```

```
use demo;
select s.id,s.name,c.id,c.name
from student s ,course c ,student_course sc where
s.id = sc.sid and sc.cid
= c.id and s.name = "张三";
```

```
use demo;
select s.id sid,s.name sname,c.id cid,c.name cname
from student s ,course c ,student_course sc where
s.id = sc.sid and sc.cid
= c.id and s.name = "张三";
```

limit 分页查询：limit start, length; start起始位置，length截取的长度

```
use demo;
select * from student limit 6,3;
```

distinct 去重

```
use test;
select distinct age from t_user;
```
